

AI Document Analyzer App

I checked the reference style. The design direction is a **modern AI document analyzer interface** with a clean, premium SaaS/mobile feel — dark UI, AI assistant experience, document cards, insights, summaries, and risk analysis patterns similar to other AI document analyzer concepts. ([Dribbble](#))

Below is the **UI/UX Design Document** for implementing that design style into your **AI Contract & Legal Document Analyzer** using **React.js + Supabase**.

UI/UX Design Document

AI Contract & Legal Document Analyzer

1. Design Overview

Project Name:

AI Contract & Legal Document Analyzer

Design Goal:

Create a modern AI-powered legal document analysis platform that helps users upload, understand, and analyze contracts through a clean, intuitive, and trustworthy interface.

The design focuses on:

- Simplicity
 - Trust
 - AI-powered interaction
 - Easy document understanding
 - Professional legal-tech appearance
-

2. Design Inspiration

The interface follows a modern AI document analyzer style:

- Dark premium theme
- Rounded cards
- Minimal typography
- AI assistant interaction
- Document preview sections
- Analytics-style insights
- Clear risk visualization

The design should feel similar to modern AI productivity tools while maintaining a professional legal identity.

3. Design System

Color Palette

Primary Background:

- Dark Navy / Black Gradient

Purpose:

- Creates premium AI product feeling
- Reduces visual distraction

Primary Accent:

- Purple / Blue Gradient

Purpose:

- Represents AI intelligence
- Used for buttons and highlights

Secondary Colors:

Success:

- Green → Safe clauses

Warning:

- Orange → Attention required

Danger:

- Red → Risky clauses

Neutral:

- Grey → Secondary information
-

4. Typography

Font Family:

Modern Sans Serif

Recommended:

- Inter
- Poppins
- Manrope

Text Hierarchy:

Heading:

- Bold
- Large size
- High contrast

Body:

- Medium size
- Easy readability

AI Insights:

- Highlighted cards with clear spacing
-

5. Application Structure

Main Screens

1. Landing Page
 2. Authentication
 3. Dashboard
 4. Document Upload
 5. Document Analysis Screen
 6. AI Chat Assistant
 7. Document History
 8. User Profile
-

6. Landing Page Design

Purpose:

Introduce the AI legal assistant and encourage users to analyze documents.

Sections:

Hero Section

Components:

- Main heading:
"Understand Your Contracts with AI"
- Description:
"Upload legal documents and instantly get summaries, risks, and important insights."
- Primary CTA:
"Analyze Document"
- Secondary CTA:
"Explore Features"

Hero Visual:

Contains:

- AI document illustration
 - Floating document cards
 - AI analysis indicators
 - Risk badges
-

7. Dashboard Design

Layout:

Top Navigation

Contains:

Left:

- Logo

- Product name

Right:

- Profile
 - Settings
 - Notifications
-

Welcome Section

Example:

"Good Morning, Vedanti 🙌"

"Analyze your legal documents faster with AI."

Statistics Cards

Cards:

Documents Analyzed

Example:

24

Risk Detected

Example:

8

Safe Documents

Example:

16

Design:

- Rounded cards
- Small icons
- Gradient highlights

8. Document Upload Screen

Design:

Large drag-and-drop upload card.

Components:

Upload Icon

Text:

"Upload your legal document"

Supported:

- PDF
- DOCX

Button:

"Start Analysis"

Additional:

Recent Documents section:

- Contract.pdf
- Agreement.docx
- Policy.pdf

9. Document Analysis Screen

Main Layout:

Three-column dashboard style.

Left Section:

Document Preview

Contains:

- PDF viewer
 - Page navigation
 - Highlighted clauses
-

Center Section:

AI Analysis

Cards:

Summary Card

Displays:

"Document Summary"

Example:

"This agreement defines employment terms between..."

Important Clauses

Shows:

Payment Terms

Termination Clause

Confidentiality

Responsibilities

Right Section:

Risk Analysis Panel

Risk Score

Example:

72/100

Color Indicator:

Low Risk

Medium Risk

High Risk

10. AI Assistant Chat Screen

Purpose:

Allow users to ask questions about uploaded documents.

UI:

Chat Interface:

AI Message:

"Your contract contains a termination clause."

User Message:

"What happens if I cancel?"

Features:

- Chat bubbles
- Suggested questions
- Document references

Example Suggestions:

"Summarize this contract"

"Find risky clauses"

"What are my obligations?"

11. Document History Screen

Card Design:

Each document card contains:

File Name

Upload Date

Risk Score

Analysis Status

Actions:

- View Analysis
 - Delete
 - Download Report
-

12. Components Required in React

Layout Components:

- Navbar
- Sidebar
- Footer

UI Components:

- Button
- Card

- Modal
- Badge
- Progress Bar
- Tabs
- Chat Bubble

Feature Components:

- DocumentUploader
 - DocumentViewer
 - SummaryCard
 - RiskCard
 - ClauseCard
 - AIChat
-

13. User Experience Flow

User opens application

↓

Creates account / Login

↓

Uploads contract

↓

Document processing animation

↓

AI analyzes document

↓

Dashboard displays:

- Summary
- Clauses
- Risks

- Obligations

↓

User interacts with AI assistant

↓

Downloads analysis report

14. Responsive Design

Desktop:

- Multi-column dashboard
- Side navigation
- Document preview

Tablet:

- Two-column layout

Mobile:

- Single-column cards
 - Bottom navigation
 - Collapsible sections
-

15. UI Animations

Recommended:

- Upload progress animation
- AI scanning animation
- Card hover effects
- Smooth page transitions

- Loading skeletons
-

16. Accessibility

Requirements:

- Proper color contrast
 - Keyboard navigation
 - Readable font sizes
 - Clear error messages
-

17. Implementation Plan

React.js

Create reusable components:

```
src/  
├── components/  
│   ├── Navbar.jsx  
│   ├── Sidebar.jsx  
│   ├── DocumentCard.jsx  
│   ├── RiskCard.jsx  
│   └── ChatBox.jsx  
├── pages/  
│   ├── Dashboard.jsx  
│   ├── Upload.jsx  
│   └── Analysis.jsx  
└── styles/
```

18. Final Design Outcome

The final product should look like a professional AI legal assistant platform that combines:

- Modern AI aesthetics
- Legal technology trust
- Simple document understanding
- Interactive insights
- Professional dashboard experience

The UI should communicate:

"Complex legal documents made simple with AI."

This design will fit well with your **React + Supabase + Vercel capstone implementation** and will look more like a real SaaS product rather than a college project.
